

Rohit Chandra Kapri

Student

Highly motivated and enthusiastic individual with a strong desire to secure an internship that will enable me to gain valuable hands-on experience in a professional environment. I am eager to apply the knowledge and skills I have gained in a practical context and continue my growth within a professional setting. I am confident that my enthusiasm, dedication, and willingness to learn will make me a valuable asset to any organization.

PERSONAL PROJECTS

Rental Bookstore (02/2024 - Present)

- Rental Bookstore is a Fullstack application made using MERN Stack Technology. This application resembles a eye catching UI and has features lik login, browse books by category and rent books.
- Link to GitHub: [Rent-A-Read](#)

Netflix UI Clone App (10/2023 - Present)

- I have developed a Netflix clone app that closely resembles the user interface of the popular streaming platform, Netflix. This project involved integrating data from The Movie Database (TMDb) API to provide users with a comprehensive library of movies and TV shows
- Link: [Netflix_Clone](#)

Speech to Text Converter Web App (11/2023 - Present)

- I have developed a web app using reactjs technology that can convert whatever you say to text.
- Link: [App](#)
